They may still get to soil sampling this season if Aug can dry out a bit before the snows and freeze-up comes in October.

Melanie,

The Army will still need to do the soil/sediment sampling at Tanana River OB/OD. Yes, it will likely be in next year's field season.

Harry

Subject: RE: Daily's

To All:

I have attached a current update on the Time Critical Removal Action at CC-FTWW-068 Former OB/OD River Site on the Fort Wainwright Small Arms, Close-in Range Complex.

The attached pictures were taken on 16 July 2016.

Rain continues to hamper the production process, and the river has crested the site bank.

The Army has temporarily suspended actions at this site.

Please forward this information as needed.

I will send the field crew's daily reports from 5 Jul to current day in a separate email.

Thank you for your continued support for this effort.

Joe Malen  
Restoration Program Manager
